Summary

Results-driven product manager focused on outcomes and operational efficiency. Over four years of experience building B2B SaaS and AI-enabled products in emerging markets, leveraging a strong operations foundation to align customer needs with internal execution. Decisive in prioritising core features and determining scope in resource-constrained, fast-paced environments. As Product Lead at QShop, I drove activation strategies that reduced onboarding drop-off from 70% to 45% while managing a commerce portfolio generating \$5.2M in annual GMV across 18,000+ monthly orders.

Work Experience

Yoke Solutions and QShop Tech (sister companies)

Remote, Nigeria

Product Lead, QShop Tech (promoted from Product Manager, April 2024)

June 2022 - Present

- Report directly to the founder, manage an associate PM, and set sprint delivery priorities to maximise engineering output, lifting overall throughput by about 30%.
- Extended the admin surface to convert five recurring support requests into self-serve actions, resolving root-cause issues and significantly reducing support team workload.
- Reduced onboarding drop-off from 70% to 45% by redesigning and optimising the activation flow through structured, hypothesis-led experimentation.
- Own product strategy for a commerce portfolio representing \$5.2M in annual GMV and 18,000+ monthly orders across 59,700+ registered stores.
- Decreased time-to-first-sale for new merchants by 15% and launched promotion and discovery features that boosted store-level order volume.

Lead Project Manager, Yoke Solutions

April 2024 - Present

- Led a five-person cross-functional team through the Nigerian Communications Commission website overhaul: all 16 contractual scope items accepted, with agreed UX and accessibility acceptance scores up 50%.
- Direct public-sector delivery for the Lagos State Employment Trust Fund (LSETF), taking three Lagos Innovates programme sites from proposal and scoping through launch.
- Ekiti State Labour Market Information System: all seven contractual deliverables signed off; as Transformation Lead, wrote the rollout blueprint, with 1,400+ job seekers registered at handover.
- Manage B2B consultancy delivery generating \$50K+ in annual revenue across custom enterprise solutions.
- Accelerated delivery timelines by 10% across 3 concurrent enterprise projects by standardising cadence, tightening scope control, and enforcing strict Agile governance.

Orpheez (design and product studio, now a Yoke Solutions brand)

Remote

Project and Product Manager, part-time

2025 - Present

- Run client engagements for the studio, translating discovery into scoped plans, decision briefs, roadmaps, and prototypes that move engagements into build.
- Lead day-to-day execution of a cross-border money-transfer app for a US client under NDA: timeline, resourcing, risks, and a weekly steering committee. Design phase signed off in January 2026.

Design Manager

2021 - 2023

- Led design across 20+ studio projects.

MyFarmbase Africa (EdTech and agribusiness platform)

Remote, Nigeria

Chief Operating Officer

June 2019 - November 2021

- Scaled an EdTech and agribusiness platform from inception to 9,000+ active users across West Africa, supporting the launch of 200+ profitable agribusinesses.
- Automated core manual operational processes for training cohorts, reducing administrative overhead by over 50%.

Skills

Product strategy | Roadmaps | Customer discovery | User research | Experimentation and A/B testing | Activation and retention | Product analytics | B2B SaaS | Growth | 0 to 1 product development | Agile and Scrum | Stakeholder management | PRDs | AI-assisted prototyping | Product delivery

Projects

QTrack | Product Owner | March - September 2025

- Validated a WhatsApp expense-tracking product with 500+ users, then recommended discontinuing it after identifying dependencies on deep behavioural shifts and unviable bank-API requirements.

Imperium Utilities | Product and Delivery Lead | April 2024 - Present

- Lead product strategy and delivery for an energy-utility platform consolidating operational data for analytics and forecasting, featuring multi-tenant architecture and role-based access control.

TractalQ | Product Owner | 2025 - Present

- Ran an operations diagnostic at Acutech before any build, mapping an 18-stage pipeline where approvals took over a week; now own the resulting field-evidence and approvals product.

Sugar Guest Pro | Product Manager | June 2025 - Present

- Interviewed event planners and ran rapid WhatsApp experiments to validate guest-list and check-in workflows before committing to a bigger build.

Volunteer Leadership

Programme Lead | Morph by TNX Solve (Teen product development programme)

- Architect programme and event infrastructure for a six-week product-building programme, author grant proposals and performance frameworks, and serve as Designated Safeguarding Lead.

Facilitator | Global Shapers Ota Hub (Digital Alchemy, April 2026)

- Facilitated a hands-on train-the-trainer session on AI and no-code product development, guiding participants from problem definition to functional prototyping.

Volunteer Board Member | Adlai Heroes Foundation (since January 2026)

- Advise on programme strategy, operational execution, and digital product initiatives.

Certifications

McKinsey Forward | Problem-Solving and Leadership Bootcamp | 2021

Agile Project Management | UTIVA | 2020

Education

Tekedia Institute | mMBA, Business Administration | 2021

Federal University of Agriculture, Abeokuta | B.Sc. Agricultural Administration | 2020
