Summary

Results-driven product manager focused on outcomes and operational efficiency. Over four years of experience building B2B SaaS and AI-enabled products in emerging markets, leveraging a strong operations foundation to align customer needs with internal execution. Decisive in prioritising core features and determining scope in resource-constrained, fast-paced environments. At QShop, I drove activation strategies that reduced onboarding drop-off from 70% to 45% while managing a commerce portfolio generating \$5.2M in annual GMV across 18,000+ monthly orders.

Work Experience

Yoke Solutions and QShop Tech (sister companies) Remote, Nigeria

Product Manager, QShop Tech June 2022 - Present

- Report directly to the founder, manage an associate PM, and establish sprint delivery priorities to maximize engineering output, lifting overall throughput by 30%.
- Extended the admin surface to convert five recurring support requests into self-serve actions, resolving root-cause issues and significantly reducing support team workload.
- Reduced onboarding drop-off from 70% to 45% by redesigning and optimizing the activation flow through structured, hypothesis-led experimentation.
- Own product strategy for a commerce portfolio representing \$5.2M in annual GMV and 18,000+ monthly orders across 59,700+ registered stores.
- Decreased time-to-first-sale for new merchants by 15% and launched promotion and discovery features that boosted store-level order volume.

Lead Project Manager, Yoke Solutions April 2024 - Present

- Led a 5-person cross-functional team through a full government agency portal overhaul, improving UX and accessibility acceptance scores by 50% within seven months.
- Directed public-sector delivery initiatives for Lagos State Employment Trust Fund (LSETF) - Lagos Innovates web platforms and a specialised government insights platform.
- Manage B2B consultancy delivery generating \$50K+ in annual revenue across custom enterprise solutions.
- Accelerated delivery timelines by 10% across 3 concurrent enterprise projects by standardizing cadence, tightening scope control, and enforcing strict Agile governance.

Orphee Remote

Project and Product Manager, part-time, project-based February 2022 - Present

- Provide advisory and project-based product leadership, translating discovery into actionable roadmaps, decision briefs, and prototypes to advance engagements into active development.
- Spearheading the development of a FinTech product as a non-custodial US money-transfer product on a licensed partner infrastructure, defining operational models for KYC, fund movements, and payout workflows.

MyFarmbase Africa (EdTech and agribusiness platform) Remote, Nigeria

Chief Operating Officer June 2019 - November 2021

- Scaled an EdTech and agribusiness platform from inception to 9,000+ active users across West Africa, supporting the launch of 200+ profitable agribusinesses.
- Automated core manual operational processes for training cohorts, reducing administrative overhead by over 50%.

Skills

Product strategy | Roadmaps | Customer discovery | User research | Experimentation and A/B testing | Activation and retention | Product analytics | B2B SaaS | Growth | 0 to 1 product development | Agile and Scrum | Stakeholder management | PRDs | AI-assisted prototyping | Product delivery

Projects

QTrack | Product Owner | March - September 2025

- Validated a WhatsApp expense tracking product with 500+ users; made the strategic decision to deprecate the initiative upon identifying dependencies on deep behavioral shifts and unviable bank-API requirements.

Ekio | Product Manager | 2026 - Present

- Contribute to the discovery process for a compliance document-governance product for regulated Nigerian fintechs, driving product direction and value proposition definition through customer discovery.

Imperium Utilities | Product and Delivery Lead | 2024 - Present

- Lead product strategy and delivery for an energy-utility platform consolidating operational data for analytics and forecasting, featuring multi-tenant architecture and role-based access control.

Sugar Guest Pro | Product Manager | June 2025 - Present

- Oversee product development for an event-management SaaS handling guest lists and check-ins; executed rapid WhatsApp experiments to validate key workflows before scaling development.

Volunteer Leadership

Programme Lead | Morph by TNX Solve (Teen product development programme)

- Architect program and event infrastructure while authoring grant proposals and performance management frameworks.

Facilitator | Global Shapers Ota Hub (Digital Alchemy, April 2026)

- Facilitated a hands-on train-the-trainer session on AI and no-code product development, guiding participants from problem definition to functional prototyping.

Volunteer Board Member | Adlai Heroes Foundation

- Advise on program strategy, operational execution, and digital product initiatives.
